Pecunia FX Fund (the "Sub-Fund") is a sub-fund of Protea Fund (the "Fund") Class I EUR (the "Class") - ISIN: LU2033379061

The Fund has appointed FundPartner Solutions (Europe) S.A. as management company.

Objectives and investment policy

The Sub-Fund Protea Fund - Pecunia FX Fund is a medium/high risk vehicle, suitable for investors who are seeking capital growth over the long term and who are able to tolerate considerable price fluctuation. The investment horizon should be at least 5 years.

There can be no guarantee that the Sub-Fund's objective will be achieved.

The Sub-Fund is actively managed. The Sub-Fund has no benchmark index and is not managed in reference to a benchmark index.

The Sub-Fund aims to offer superior risk-adjusted returns via a diversified portfolio of the eight major currencies and their crosses and to profit from foreign exchange movements. The denomination of the Sub-Fund has therefore been chosen to include the Latin term for "money", being "pecunia" as well as the abbreviation for foreign exchange ("FX"). The Sub-Fund will follow a systematic approach via an automated trading system. The approach has no initial bias to market direction and uses a comprehensive structure of algorithms.

The Sub-Fund strategy is deployed through a diversified portfolio of long and short positions within a universe of 8 currencies (EUR, GBP, USD, CAD, CHF, JPY, AUD, NZD).

In order to achieve its objective, the Sub-Fund will mainly invest:

- directly in the currencies mentioned in the previous paragraph, i.e. cash accounts and deposits in the 8 above-mentioned currencies; and/or
- in financial derivative instruments having as underlying or offering an exposure to the 8 above-mentioned currencies.

Due to the use of financial derivative instruments, the Sub-Fund may hold a substantial part of its assets in the form of cash deposits, money market UCIs (within the above mentioned 10% limit in UCITS and/or other UCIs) and Money Market Instruments.

Dealing Frequency

The net asset value for the Class is calculated weekly on last business day of the week (the "Calculation Day") on basis of the pricing of the preceding

Risk and reward profile

Risk Disclaimer

- This current risk profile is based on historical data and may not be a reliable indication of the future risk profile of the Sub-Fund.

- The risk category shown is not guaranteed and may shift over time.

- The lowest category, which corresponds to Number 1, cannot be regarded as being risk-free.

- The Sub-Fund does not provide any capital guarantee or asset protection measures.

Why is this Sub-Fund in this category?

The portfolio of this Sub-Fund consists essentially of cash accounts and deposits and financial derivative instruments having as underlying or offering an exposure to currencies. The strategy of the Sub-Fund is to invest in a diversified portfolio of long and short position within a universe of 8 currencies. Hence, the risk/reward profile of the Sub-Fund should correspond to a High risk category on the risk/reward scale.

Are there any other particular Risks?

Risks that could affect fund performance and are not necessarily fully reflected in the risk and reward rating include:

- **Liquidity risks:** The Sub-Fund may invest part of its assets in less liquid securities. Those are securities that cannot easily be sold or exchanged for cash without a substantial loss in value. Those securities also cannot be sold quickly because of a lack of ready and willing investors or speculators to purchase the asset in certain market conditions.

- **Counterparty risks:** The Sub-Fund can conclude various transactions with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Sub-Fund.

- **Credit risks:** The Sub-Fund may invest a portion of its assets in debt securities. The issuers of these debt securities may become insolvent, which will mean that the securities will lose all or some of their value.

- **Risks from the use of derivatives:** The Sub-Fund may use financial derivatives instruments which may result in the Sub-Fund being leveraged and may result in material fluctuations in the value of the Sub-Fund. Leverage on certain types of transactions including derivatives may impair the Sub-Fund's liquidity, cause it to liquidate positions at unfavourable times or otherwise cause the Sub-Fund not to achieve its intended objective.

Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested resulting in the Sub-Fund being exposed to a greater loss than the initial investment.

- **Operational risks:** The Sub-Fund may fall victim to fraud or criminal acts. It may suffer losses as a result of misunderstandings or mistakes by employees of the management company or by external third parties or may be damaged by external events, such as natural disasters.
